The Power of Dreams

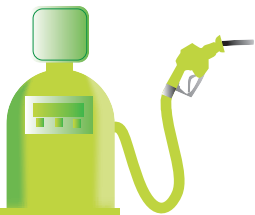

With the ever increasing cost of living it is refreshing to see how economical and affordable commuting and fun can be.

Honda's new Vision 110 costs a mere £1800 new, with a two year warranty on the road. Why would you sit in a fuel guzzling car built for four or five people in a traffic jam you could avoid?

We have some amazing finance deals, some bikes on 0%, some with only a £99 deposit and we can take cars in part exchange. If your part exchange is worth more than your chosen scooter, we will give you cash back. Scooters reduce congestion, save you time on your journey and reduce carbon emissions.

Interested? Then give us a call on one of the numbers below.

In a test run by Motorcycle Monthly in October's issue, these scooters achieved the following results:
